

PDO THREADS

non-invasive thread lift
now **ONLY AT**

BestLife MedSpas are now offering PDO Threads+

HAVE YOU HEARD ABOUT THE GREATEST TREND TO EVER HIT BEAUTY?

At BestLife MedSpas we are stoked to be able to offer this new and VERY amazing technique to make you look AMAZING and without the regular expensive treatments that Botox and its siblings require.

So what are PDO Threads+ and why should I care?

PDO threads are a starch (a complex sugar) called polydioxanone which is used in aesthetics to lift and place tissue back where it was when you were younger. Once the thread is in place, the body sends signals to dissolve the thread and this creates collagen in the area where it is placed. The more threads placed the more collagen is created. This will occur over a 6-12 month period so it is not a procedure where you

walk out looking different than when you came in the previous hour.

Here's the +

ONLY at BestLife MedSpas; we take a blended approach and use filler and threads to layer both a LOOK AT ME NOW WOW@!!! factor and as your pdo threads stimulate collagen your friends will slowly start asking you about what you are doing to your skin and how young you are looking. Generally the effects will last about 2 years. The process of inserting PDO threads can be uncomfortable so Dr. Garner can have a driver pick you up and drop you off at home if you would like to take medication prior to the procedure. We will be providing nitrous oxide "laughing gas" to make your treatment as enjoyable as possible!

It is very important to control pain! A dental block is part of your service when you have any areas around your mouth done. This will last for about an hour or so.

We have 3 types of PDO threads we use... straight threads where a meshing technique is layered into the area treated, twisted or corkscrew allows for more surface area of the PDO to be placed in the area, and a cog or barb type which is similar to a rose stem, it has thorns to catch the tissue and allow it to be lifted.

For best outcome we use a variety of threads depending on the area we are treating.

Common areas are cheeks or midface (to lift up and replace the volume loss in the cheeks to get rid of those jowls and marionette lines)

Forehead to lift eyebrows remove those furrows (11's) between the eyes and remove those forehead wrinkles (without the use of any neurotoxin)

We can use a combination of threads to lift the area around the knees, breasts, lift the area between the nose and the lip "lift lip"; pop the lip edge for a prettier pout and better define the edges.

BestLife also offer 0% Financing for 6 Months OAC!!!

For 2 years of beauty + the immediate WOW! Factor + LESS damage and wrinkles to your beautiful face!!
